Subject RE: Westlake Landfill

Cheryle - Darrick said that Tim is out and may not be in tomorrow. He said that he is comfortable talking about it (mostly listening to what Allied has to say) and briefing Tim about it later. We will not stick our necks out on anything tomorrow. I will fill you in on the issue before we agree to anything.

Dan, I have another meeting at 10 on Friday but I don't think you need me for this as it is basicity the state's call. I hope their attorney is going to be on; I know that Tim has done solid waste issues for the state. Cheryle

Subject RE: Westlake Landfill

I welcome Darrick's participation and will check with our group to see

who wants to participate.

I am available either tomorrow morning (Thursday at 10:00) or any time Friday. Maybe we should tentatively set the call for 10:00 a.m. Friday with Thursday at 10:00 a.m. as a second alternative. In the meantime, we each can check to make sure those who want to participate can make it. Does that sound OK with you?

Mike,

I am tied up tomorrow (Thurs) afternoon. Otherwise, I am mostly available for the remainder of the week. May we include Darrick Steen or some appropriate person from MDNR in this discussion? - since it is apparently MDNR's definition of "clean fill" that must be met.

RE: Westlake Landfill

Dan,

As I understand it, the landfill operator has been approached by the City of Bridgeton and contractors about accepting concrete rubble that would meet the MDNR definition of "Clean Fill". We have been reviewing

internally whether this material can be accepted at the landfill, including whether it could be used as part of the remedy of either OU1 or OU2.

I was in Jefferson City yesterday about an unrelated air permit and planned to call you today to discuss this very issue because the Allied is concerned about the timing of accepting these materials. Opportunities to get this type of material occur on a sporadic basis. Allied would like to use this material to reduce the remedy cost. Allied has considered stockpiling it at or near the landfill, but there will not be much, if any, cost savings if the materials have to be double-handled. Are you available to discuss this issue in the next day or two?

I am forwarding this for your awareness. Is the landfill bidding on rubble other than the stadium rubble now?

Westlake Landfill

Dan,

The department was recently contacted by Rick Walker of Allied Waste and Bob Llyod with the City of Bridgeton about storing or disposing of concrete rubble at Westlake Landfill. The source of the concrete debris appears to be from street repair work in Bridgeton. The way I understand it, Allied Waste is proposing to use the rubble for possible closure requirements on OU-1 (the radiological area) at Westlake. Rick Walker has also proposed to meet with concerned parties to explain what they are wanting to do.

As discussed previously with the Busch Stadium rubble issue, in general, MDNR does not have a problem with the idea of using the concrete debris as the rock armoring layer and for fill areas to meet slope requirements. However, this rock armoring layer has never been defined very specifically and would ultimately require an engineered design to determine proper sizing and depth requirements so as to serve its intended purpose.

It also appears there may be a disconnect between the operation's staff at the landfill and the folks that are involved with the Westlake OU-1 and OU-2 RI/FS. The department feel's that one should be cautious about any action involving the OU-1 or OU-2 area since the remedy has yet to be defined or even selected at this time. If possible, please check with the Westlake clients to be sure that everyone is on the same page.

Please give me a call if you would like to discuss it further.
